双人乒乓球

杨奕博 何可人

摘要: 利用 catt 模块在局域网中连接两个芯片,实现双人对战乒乓球小游戏

一、选题与创意介绍:

其实本来我们组想做魔方机器人,大部分都要完工了,结果发现有一个齿轮实在对不 上, 于是转而做一个双人小游戏

二、实现方案及代码分析

P1 为主控制方,连接后 gewubit 显示 connecting…字样,代表正在连接 P1 先选择游戏难度,有三个难度 easy mild hard, 选择后进入游戏, 期间 P2 等待 P1 P2 通过按 a b 按钮控制'球拍'左右运动,控制球的弹跳,球碰到左右墙壁会反弹, 碰到一方底线则该方判负

胜负方分别显示输赢字样, P1 按下 a, 游戏重新开始

程序设计:

第一部分: P1 建立代理(这里连接的是我的手机热点,用'通信猫'网站作中继)

```
1. import gewu
2. import network
3. import time
4. import ujson
5. from umqtt import MQTTClient
6. wlan = network.WLAN(network.STA IF)
7. wlan.active(True)
8. if not wlan.isconnected():
9.
       gewu.display.fill(OLED.BLACK)
10.
       gewu.display.text(str('connecting...'),1,0,6)
       gewu.display.show()
11.
       wlan.connect('yyb','12345678')
13.
       while not wlan.isconnected():
14.
           pass
15. while (wlan.ifconfig()[0]=='0.0.0.0'):
     time.sleep(1)
17. gewu.display.fill(OLED.BLACK)
18. string='network config[0]:',wlan.ifconfig()[0]
19. gewu.display.text(str('OK'),1,0,6)
20. gewu.display.show()
21. time.sleep(1)
22.
23. gewu.display.fill(OLED.BLACK)
24. gewu.display.text(str('OK'),1,0,6)
25. gewu.display.show()
27. ssid='yybphy'
```

```
28. passwd='yybphy'
          29. client id='usersname'
          30. mserver = 'mq.tongxinmao.com'
          31. port=18830
          32. topic_ctl = b'/public/TEST/jwebcli'
          33. topic_sta = b'/public/TEST/jwebcli'
          34.
          35. def sub_callback(topic,msg):
          36.
                 pass
          37.
          38.
          39. #消息发送
          40. client = MQTTClient(client_id,mserver,port)
          41. client.set_callback(sub_callback)
          42. client.connect()
          43. client.subscribe(topic ctl)
第二部分:P2 接受信息(中间有 P2 部分的游戏操纵)
          1.
                     import gewu
          2. import network
          3. import time
          4. import ujson
          5. from umqtt import MQTTClient
          6. #网络连接初始化
          7. wlan = network.WLAN(network.STA_IF)
          8. wlan.active(True)
          9. if not wlan.isconnected():
                  gewu.display.fill(OLED.BLACK)
          10.
          11.
                  gewu.display.text('connecting...', 0, 0, 6)
          12.
                  gewu.display.show()
                 wlan.connect('yyb','12345678')
          13.
          14.
                 while not wlan.isconnected():
          15.
                      pass
          16. while (wlan.ifconfig()[0]=='0.0.0.0'):
          17.
                  time.sleep(1)
          18.
          19. gewu.display.fill(OLED.BLACK)
          20. string='network config[0]:',wlan.ifconfig()[0]
          21. gewu.display.text(str('OK'),1,0,6)
          22. gewu.display.show()
          23. time.sleep(1)
          24. gewu.display.fill(OLED.BLACK)
          25. gewu.display.text(str('wait for p1 to start'),0,38, 6)

60.
            location=str(bx)+'\#'+str(by)+'\#'+str(dx)+'\#'+str(dy)+'\#'+'t
61.
            client.publish(topic_sta,location,retain=True)
62.
            client.check_msg()
63.
            if gewu.button_a.is_pressed():
64.
                break
```

三、后续展望:

希望可以加入血量, 道具等机制, 提高可玩性

四、分工合作:

杨奕博:请求网络代理部分与部分游戏实现 何可人:信息收取部分与部分游戏实现
